

TUSCAN TAN ORIGINAL™

Tuscan Tan spray on tan solution mimics naturally tanned skin tones with 100% accuracy as it contains **Violet-Tone Complex™** - Exclusive to Tuscan Tan.

Violet-Tone Complex™ consists of six colourants formulated to counteract the yellow / orange undertones commonly seen in alternative DHA based spray tan brands. This unique combination of violet based colourants produce an instant natural tan shade when sprayed on the skin, and further creates a natural protective layer which is non-sticky, smudge proof and water

resistant.

The solution adapts to any skin type as it picks up and adopts the skin's individual darker tones, whilst deepening the colour of it's lighter variations to produce the most authentic looking tan in any shade desired, from lightly sun-kissed through to the darkest of tans. Better still, the spray on tan dries instantly on application, is completely odourless once developed, and lasts up to ten days before gradually and evenly fading.

Skin Care

The Tuscan Tan™ range of skin care products are formulated to correctly prepare the skin prior to the spray on tan application and to maintain the tan afterwards.

Heavenly scented with a blend of caramel, coconut and vanilla, all Tuscan Tan™ skin care products are fortified with a superior blend of ingredients renowned for their moisturising, soothing and antioxidant properties.

Tuscan Tan™ Exfoliating Sugar Scrub is vital in preparing the outermost cells of the skin to be most receptive to the solution during the spray on tan application, and ensure that the tan fades evenly.

Tuscan Tan™ pH Balanced Skin Wash is formulated to restore the pH balance of the skin to normal levels whilst cleansing the skin.

Tuscan Tan™ Tinted Tan Extender lotion is a light yet superbly effective hydrating body lotion which contains Tuscan Tan's very own instant bronzing tint together with a subtle pearl shimmer to keep your spray on tan looking its best.
